Features Overview

Won the German Red Dot Design Award

The BD series won the German Red Dot Design Award. It is a perfect combination of artistic beauty and industrial products, which once again interprets the excellent innovative design concept of CNLINKO.

Built-in design

The connector socket is embedded into the device, reducing the distance between the installation panel and the exposed product, saving external space.

Push-in snap design

The in-line snap design can realize one-hand in-line insertion, quick connection, convenient and efficient.

High protection level

The highest protection level can reach waterproof IP68 when connected, which can adapt to various harsh working conditions.

Type and Style

Two types are available

Plastic and metal types are optional, which can meet the differentiated demands of users for high corrosion resistance, vibration resistance and impact resistance, and high strength.

Flexible installation methods

The BD series has four-hole flanged panel mount sockets and two-hole flanged panel mount sockets for optional. Users can choose them according to actual application scenarios.

A variety of wiring methods

BD series provides product types with locking screw and soldering connection. Screw locking is quick and convenient, and soldering is more reliable.

Multi-scene application

The BD series supports various applications such as power supply, data, signal, etc., and the application requirements of various symbols.

Product Structure Image

Dozens of high-quality parts are precisely engaged to ensure the safety and stability of the connector.

Applications

DH-20 series products are used in a medical equipment

Features Overview

Strong anti-vibration and anti-shock

The shell is made of all-metal alloy material with high compressive and tensile strength, which can resist the influence of external vibration and shock.

Secure connection and secure locking

With bayonet connection and three-point locking structure design, the retention force is large, and the connection is super stable.

Resistant to high temperature and severe cold

The DH series can adapt to the wide temperature environment of -40~+85°C, and fully meet the test of the outdoor climate environment.

Visualize color distinction

Four colors to visually distinguish power, signal, fiber and data. Types can be identified at a glance to avoid mis-insertion.

Type and Style

High vibration and impact resistance

All-metal version to meet the requirements of high vibration resistance and shock resistance. DH series are all metal models, made of high-quality high-strength alloy materials, which can be used in vibration and shock environments such as vehicles and workshops.

Flexible installation methods

The DH series has three installation methods: Straight receptacle, Flange receptacle, and Floating connector. Users can choose according to actual application scenarios.

A variety of cable assembly methods

DH series provides product types with screw and welding. The screw is quick and convenient, and the welding is more reliable. The conventional model is a welding model, and it supports customization of the lock screw model.

Color can be customized

Color can be customized, your exclusive style. At present, the main colors of the DH series shells include red, yellow, blue, and green. We can also customize other colors to meet the individual needs of users.
